What is XP?

Is an agile software development framework that aims to produce higher quality software, and higher quality of life for the development team.

Its main pillar is to enhance the interpersonal relationships of the development team.

It is the ideal working method for projects with highly changing and imprecise requirements.

XP values

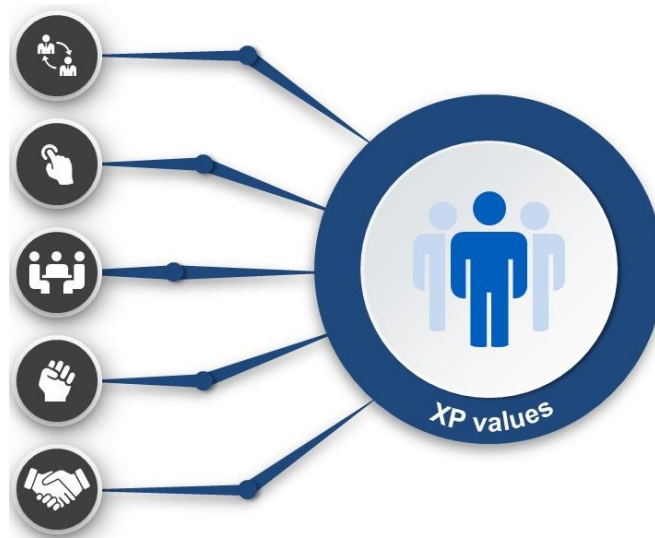

Communication

Simplicity

Feedback

Courage

Respect

Roles

The Customer

The Developer

The Tracker

The Coach

Structure

Pair programming

Code review

Unit testing

Planning game

Courage

Respect

XP process
