

## Partial II - Assignment 2 - Test Strategy VS Test Plan

Test Plan	Test Strategy
A document that defines the scope, objective, approach and emphasis on a software testing effort.	A set of guidelines that explains test design and determines how testing needs to be done.
Components include - Test plan id, features to be tested, test techniques, testing tasks, features pass or fail criteria, test deliverables, responsibilities and schedule, etc.	Components include - objectives and scope, documentations formats, test process, team reporting structure, client communication strategy, etc.
Carried out by a testing manager or lead that describes how to test, when to test, who will test and what to test.	Carried out by the project manager. It says what type of technique to follow and which module to test.
Narrates about the specification.	Narrates about the general approaches.
Can be changed.	Cannot be changed.
Done to determine possible issues and dependencies in order to identify the risks.	It is a long-term plan of action. You can abstract information that is not project specific and put it into the test approach.
Exist individually.	Is often found as a section of a test plan.
It is defined at project level.	It is set at organization level and can be used by multiple projects.
