

TI 5-3 Victor Galvan
7/1/2021

The screenshot shows the Robo 3T 1.4 application window. The top menu bar includes File, View, Options, Window, and Help. The left sidebar displays a tree view of the database structure, with 'test' selected. Under 'test', the 'usuarios' collection is expanded. The main window shows a query in the 'Query' tab: `db.usuarios.findOne({"name":"Victor Galvan"}, {"address":1})`. The 'Results' tab shows a single document with the following fields: `_id` (ObjectId), `address` (array), `building` (string), `pincode` (integer), `city` (string), and `state` (string). The execution time is 0.079 sec.

```
db.usuarios.findOne({"name":"Victor Galvan"}, {"address":1})

/* 1 */
{
  "_id" : ObjectId("52ffc33cd85242f436000001"),
  "address" : [
    {
      "building" : "22 A, Indiana Apt",
      "pincode" : 123456,
      "city" : "Los Angeles",
      "state" : "California"
    },
    {
      "building" : "170 A, Acropolis Apt",
      "pincode" : 456789,
      "city" : "Chicago",
      "state" : "Illinois"
    }
  ]
}
```
